                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           US-08-896-933-29

Sequence 29, Application US/08896933

Patent No. 622131

GENERAL INFORMATION:

APPLICANT: Terman, David S.

ITLE OF INVENTION: TUMOR KILLING EFFECTS OF ENTERCTOXINS,

TITLE OF INVENTION: SUPERANTIGENS, AND RELATED COMPOUNDS

FILE REFERENCE: 09629/005002

CURRENT APPLICATION NUMBER: US/08/896,933

CURRENT PILING DATE: 1997-07-18

EARLIER APPLICATION NUMBER: 08/252,978

SALIER PILING DATE: 1994-06-02

NUMBER OF SEQ ID NOS: 34

SOFTWARE: FastSEQ for Windows Version 3.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   192 STVSYDLFD----AQGQYPDTLLRIYRDNTTISSTSLSISLYLYT 232
